

Integrating ISO 14001:2004 and ISO 9001:2008

Acquire the skills and understanding necessary to maximize the full benefits for your company from ISO 14001:2004. This course is designed to help you integrate ISO 14001:2004 and ISO 9001:2008 as efficiently and cost-effectively as possible. Learn how to analyze the requirements of the new standard and incorporate them into your current ISO 9001:2008 practices to achieve full compliance with minimal disruption. You will also learn to address key issues in environmental management, as well as the benefits of an environmental management system (EMS) and ISO 14001:2004.

Length: 2 days

CEUs: 1.4

Prerequisites: *Knowledge of ISO 9001:2008*

WHAT YOU WILL LEARN

- Reduce the time and cost of implementing the new specifications by acquiring a concise, yet thorough understanding of the scope of ISO 14001:2004 and key terms
- Which modifications and additions to ISO 14001:2004 require attention for compliance with ISO 9001:2008
- Develop an environmental policy statement appropriate for your company
- Integrate processes for identifying environmental aspects and impacts
- Identify environmental objectives, set related targets, and establish programs for achieving results
- Integrate environmental responsibilities, awareness, and authorities into a management system
- Establish environmental metrics and indicators for monitoring performance
- Document control for ISO 14001:2004
- Identify operations that need to be controlled under EMS and identify emergency operations and contingencies that must be considered as part of EMS
- Corporate changes necessary for your company to achieve compliance and determine the resources and timing required

PLEXUS LEARNING MODEL

Learning is maximized through participation. That is why Plexus training avoids lecture-based teaching and focuses on group activities, case studies and hands-on applications. *Learn by doing.*
